```java
public static double calculateArea( double radius ) {
    return Math.PI * radius * radius ;
}
```

78.54

```java
public static void main(String[] args) {
    double diameter = 10.0;
    double area = calculateArea( diameter / 2 );

    System.out.println(area);
}
```

5.0
